### 1 通目の E メール

Hi!

I joined a school festival at my sister's high school last weekend. I saw many interesting things. There were food stands, dance shows, and even a small haunted house. Many people visited the school. I think school festivals are a good way to bring people together. Do you think school festivals are important for students?

Your friend,  
Alex

模範解答

Yes, I think school festivals are important. Students can work together and make good memories. They also learn how to plan events and talk with many people. I have two questions. How many students joined the festival? Did the students plan everything by themselves?

模範解答

Yes, I do. I think school festivals are fun and help students make good memories. They also learn how to work with friends. I have two questions. How long was the festival? Did your sister's class do something like a show or food stand?

Hi!

I want to share something with you. My mother and I visited a science museum during the holidays. There were many fun things to see. I liked the robot corner the best. I also learned a lot about space and nature. Do you think more children should go to science museums?

Your friend,  
Alex

模範解答

Yes, I think so. Science museums are fun and good places to learn. Children can see things that they don't see in school. I have two questions. How big is the museum? Are there any activities where children can try something themselves?

模範解答

Yes, I do. I think science museums are fun and help children learn. They can see many things like space and robots. I have two questions. What did you like the most? Can children touch or try anything at the museum?

## 練習問題 3

### 1 通目の E メール

Hi!

Last week, I had a great time at a zoo with my cousin. We saw many animals, but I liked the penguins the most. They walked and swam in a funny way. I think watching animals helps us learn about them. Do you think zoos are helpful for learning about animals?

模範解答

Yes, I do. Zoos help us learn what animals look like and how they move. We can learn more than just reading. I have two questions. How many kinds of animals were there? Can visitors feed or touch some animals?

模範解答

Yes, I do. I think zoos are good for learning. People can see animals move and eat. It is better than just pictures. I have two questions. Were there signs about the animals? Did you learn something new about the penguins?
